2009. "Sid Flood Memorial Roach Only" Comp.

Date: 21st June 2009.

Venue: River Beult, Cross at Hand, Kent.

Conditions: A cloudy start to a warm day with sunny periods later & a changeable breeze that caused problems with the duck weed. The river had a slight colour but running at normal level.

Summary: Again a normal turn out for this event. Barry had a job to sort out the best looking weed free swims going into the second field to do so. After the first hour the wind got up which started to move the dreaded summer 'duckweed' downstream swamping out the first few swims, both Barry & Jim were forced to move to clearer swims. Although everyone caught fish unfortunately the Roach just didn't materialize in any numbers as had been hoped, amongst the bags some reasonable Perch. Most used the pole or waggler dropping in the holes & clear water, maggot seemed to be the most productive bait. Once again Kevin & Tony amused themselves with the Pike.
By the end of the match the weed had completely blocked over areas of the river, Kevin lost the last half hours fishing with this happening.
Next year maybe a change in venue to the River Medway or a still water where this isn't a problem, Toke is 'fishing its socks off' at the moment... Sorry Sid!
